Tired eyes slowing you down?

Do your eyes feel tired by the end of the day? Do you find yourself feeling fatigued and sleepy after staring at your monitor, tablet or phone? Are the letters and numbers running together in that spreadsheet you are working on? What about that paperwork or inventory sheets you are going through? Are you feeling less productive and motivated because your eyes are having trouble focusing on your work? If so, you are not alone!

65% of adults report to have symptoms of digital eye strain.

Sixty-five percent of adults struggle with some sort of eyestrain caused by a digital device or small print.

Our team at Kalkaska Family Vision Care has helped hundreds of people improve the way their eyes see and feel leading to increased productivity and satisfaction. They have regained their edge with improved vision at home, work, using computers and reading.

We use state-of-the-art measuring equipment to come up with the best prescription for your best vision. We also use the latest digital lens designs, materials and coatings that enable you to get through your day without fatigue and strain, allowing you to focus on the tasks at hand. We also use top quality frames from the best manufactures and offer excellent warrantees. You will not find the same level of care and quality online.

“We use state-of-the-art measuring equipment to come up with your best vision.”
